

Normality check: histogram vs normal curve

seconds vs px².

Density

Q-Q plots by condition and outcome

Linear relation means normality

Sample quantiles

Theoretical quantiles

Completion time by feedback type

Accuracy: area off target curve (lower = better)

Speed vs trace error (area off target)

Feedback type: time and accuracy (Women vs Men)

Time (s)

Area off target

Speed vs trace error (split by gender)

Feedback type: time and accuracy (gaming vs non-gaming groups)

Self-reported typical hours playing games per day

Time (s)

Area off target

Speed vs trace error (split by daily gaming hours)

Self-reported typical hours playing games per day
