

Normality check: histogram vs normal curve

seconds vs px².

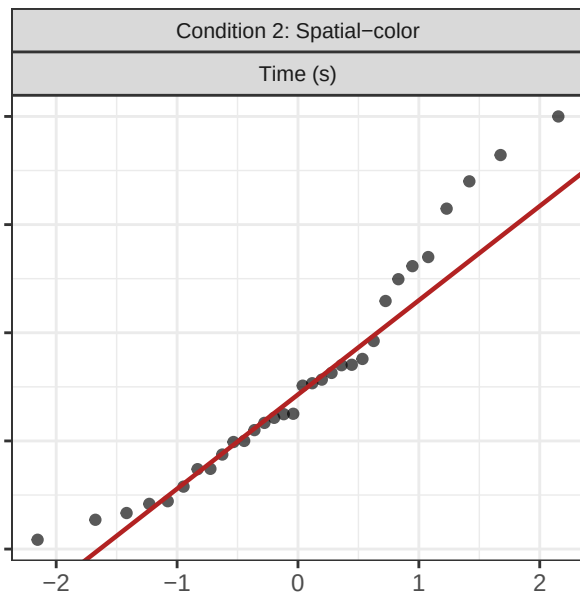

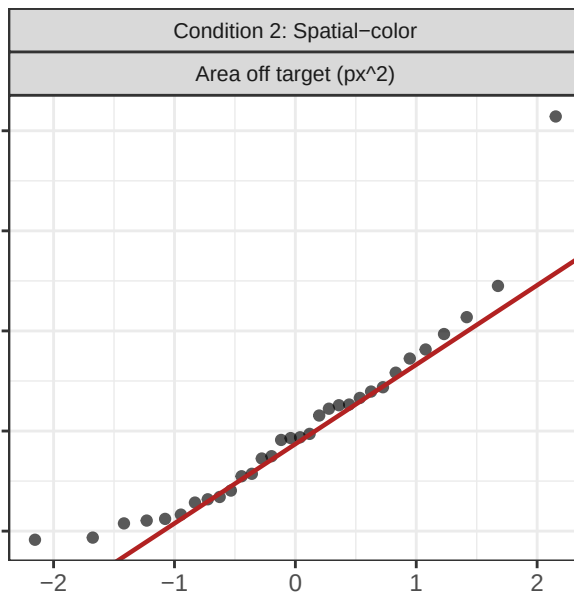

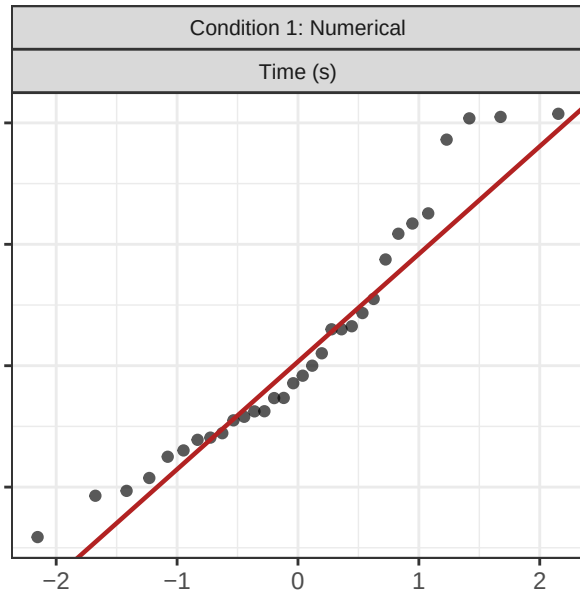

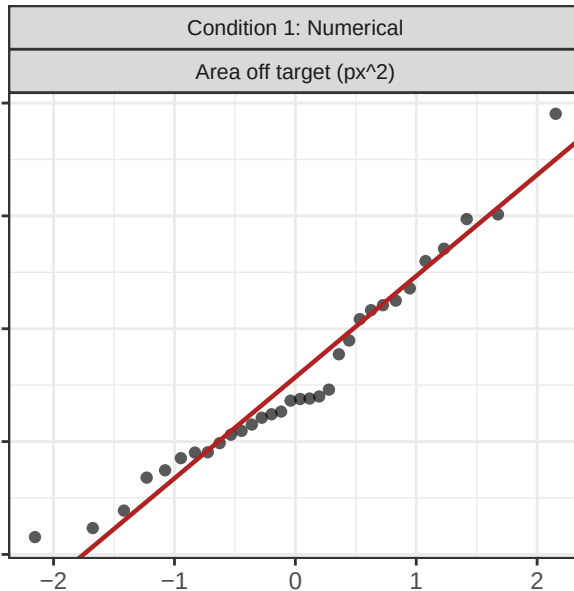

Density

Q-Q plots by condition and outcome

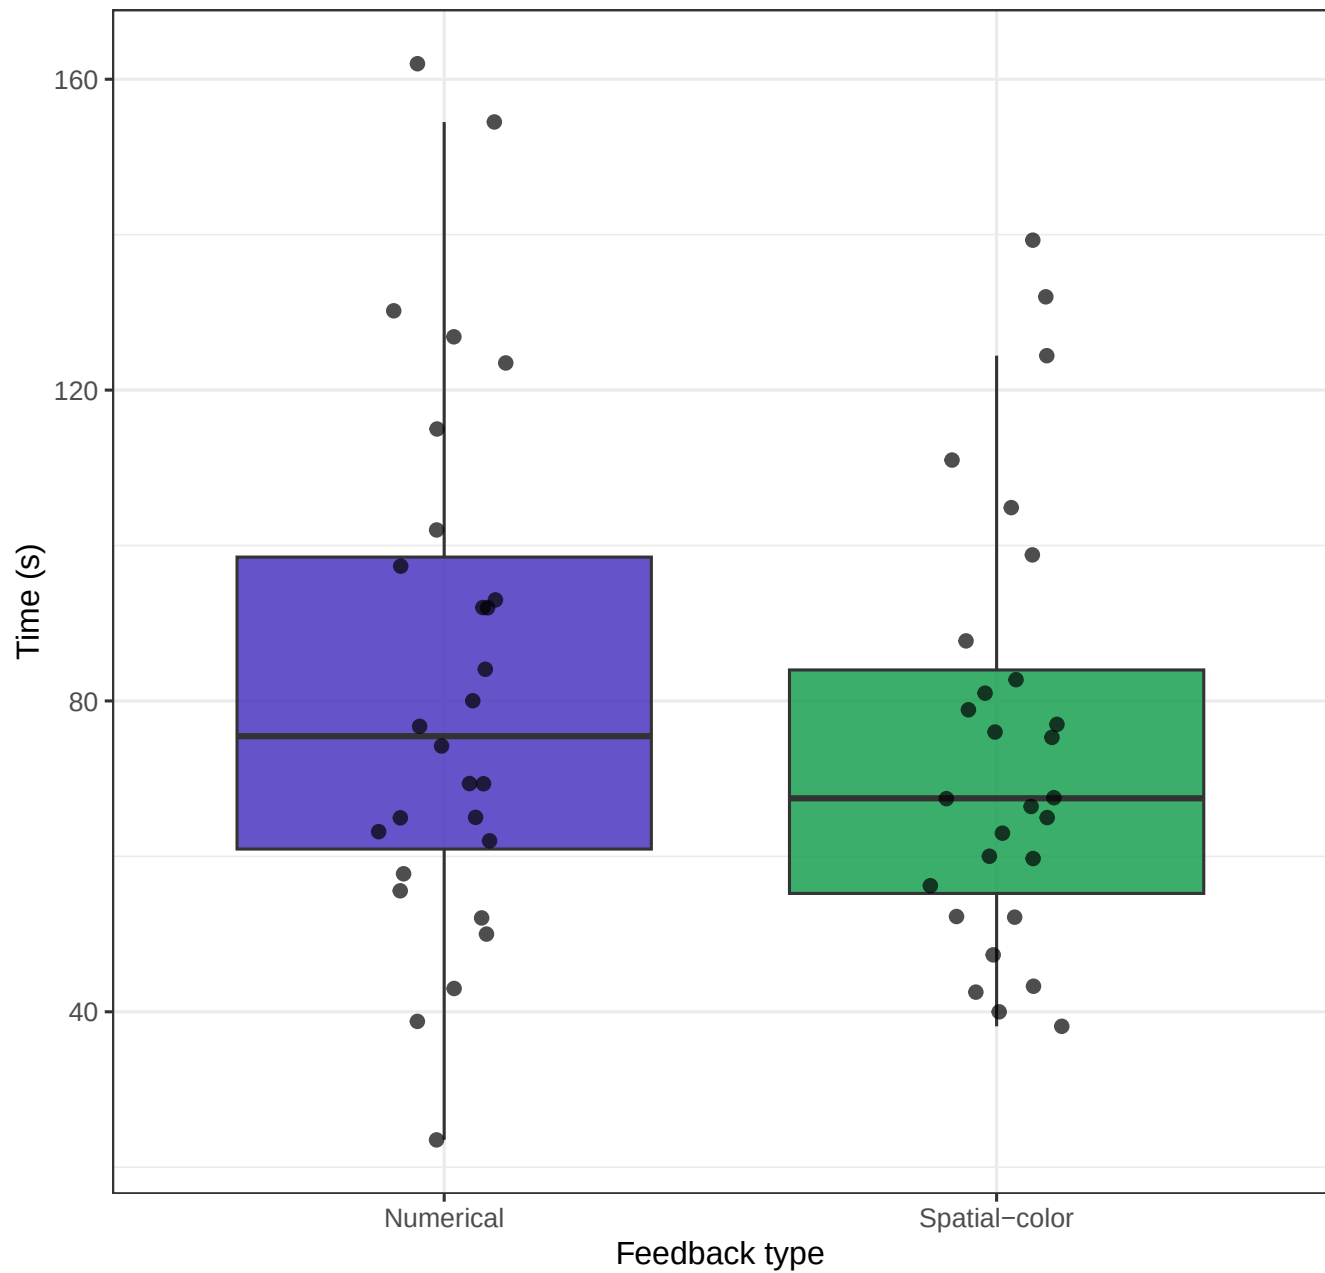

Linear relation means normality

Sample quantiles

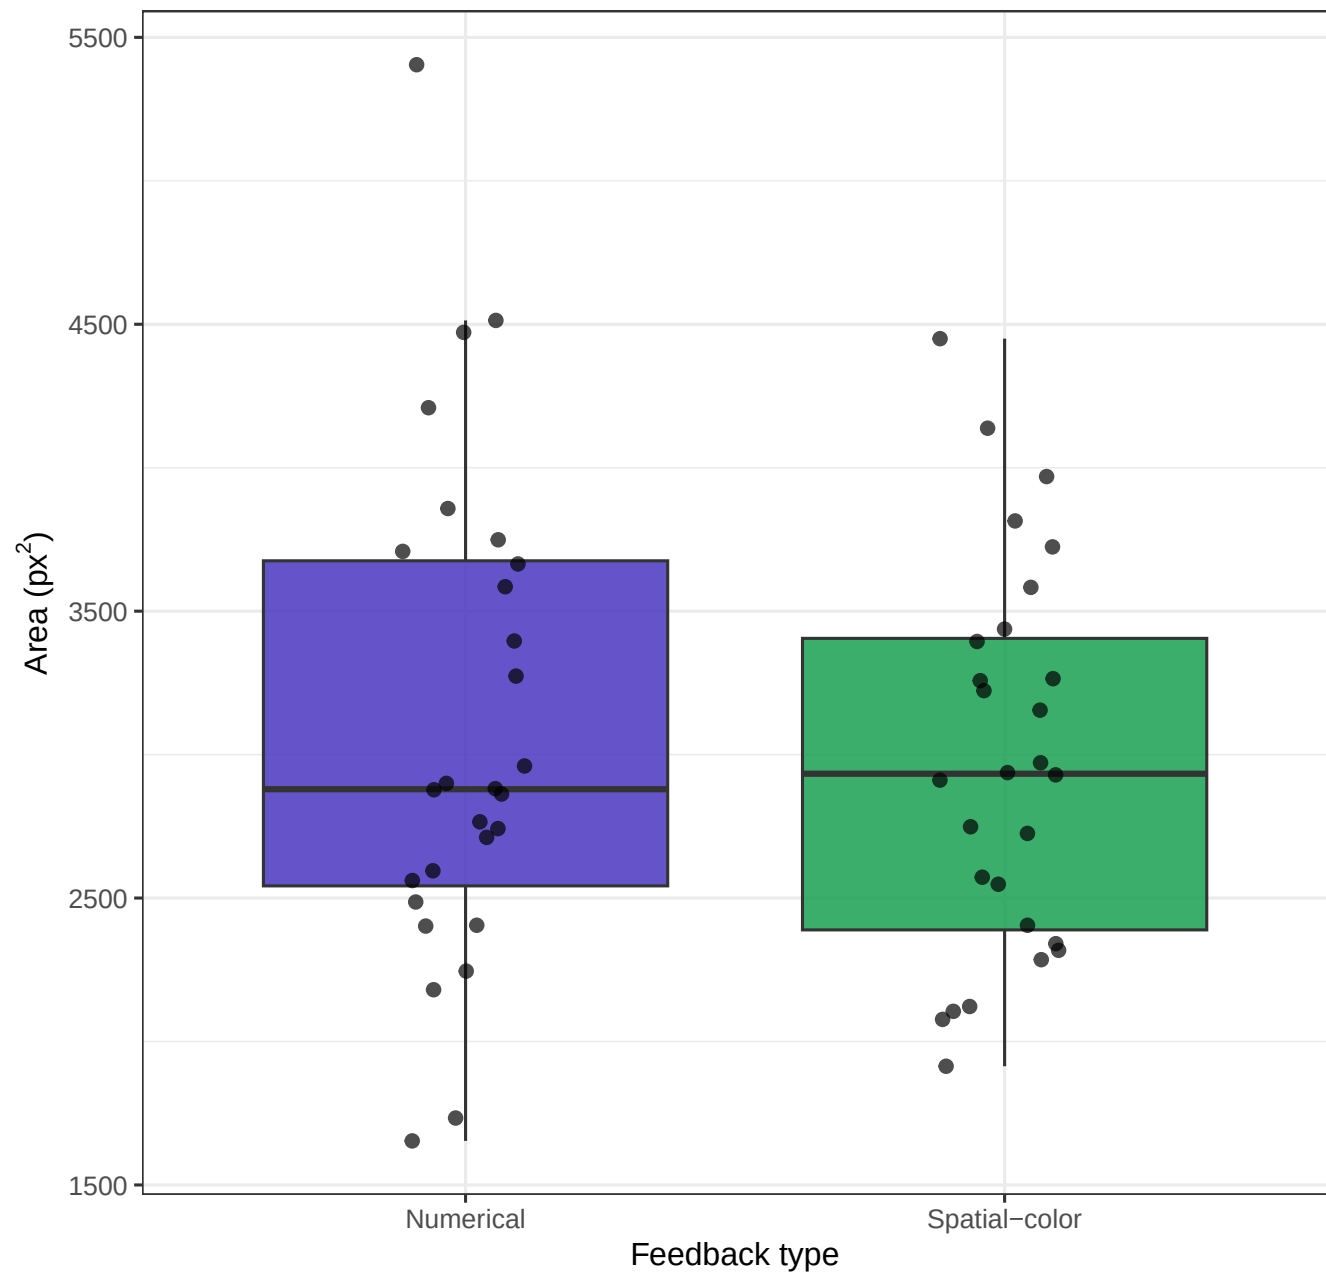

Theoretical quantiles

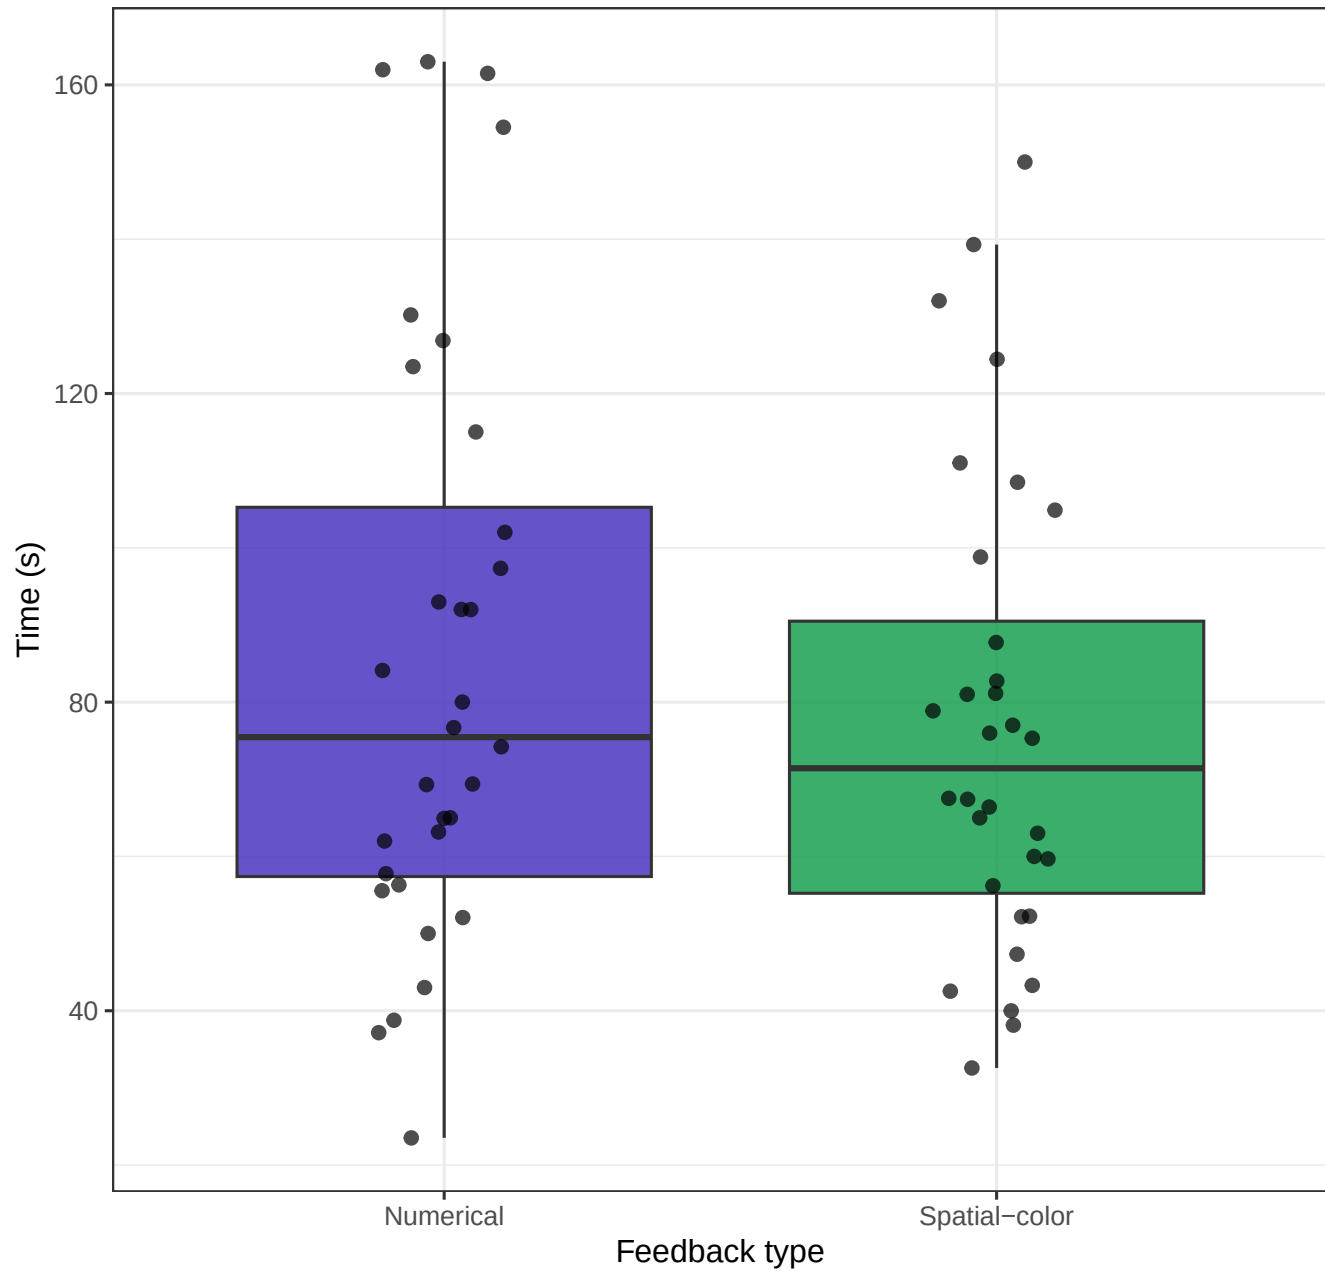

Completion time (outliers removed for sensitivity)

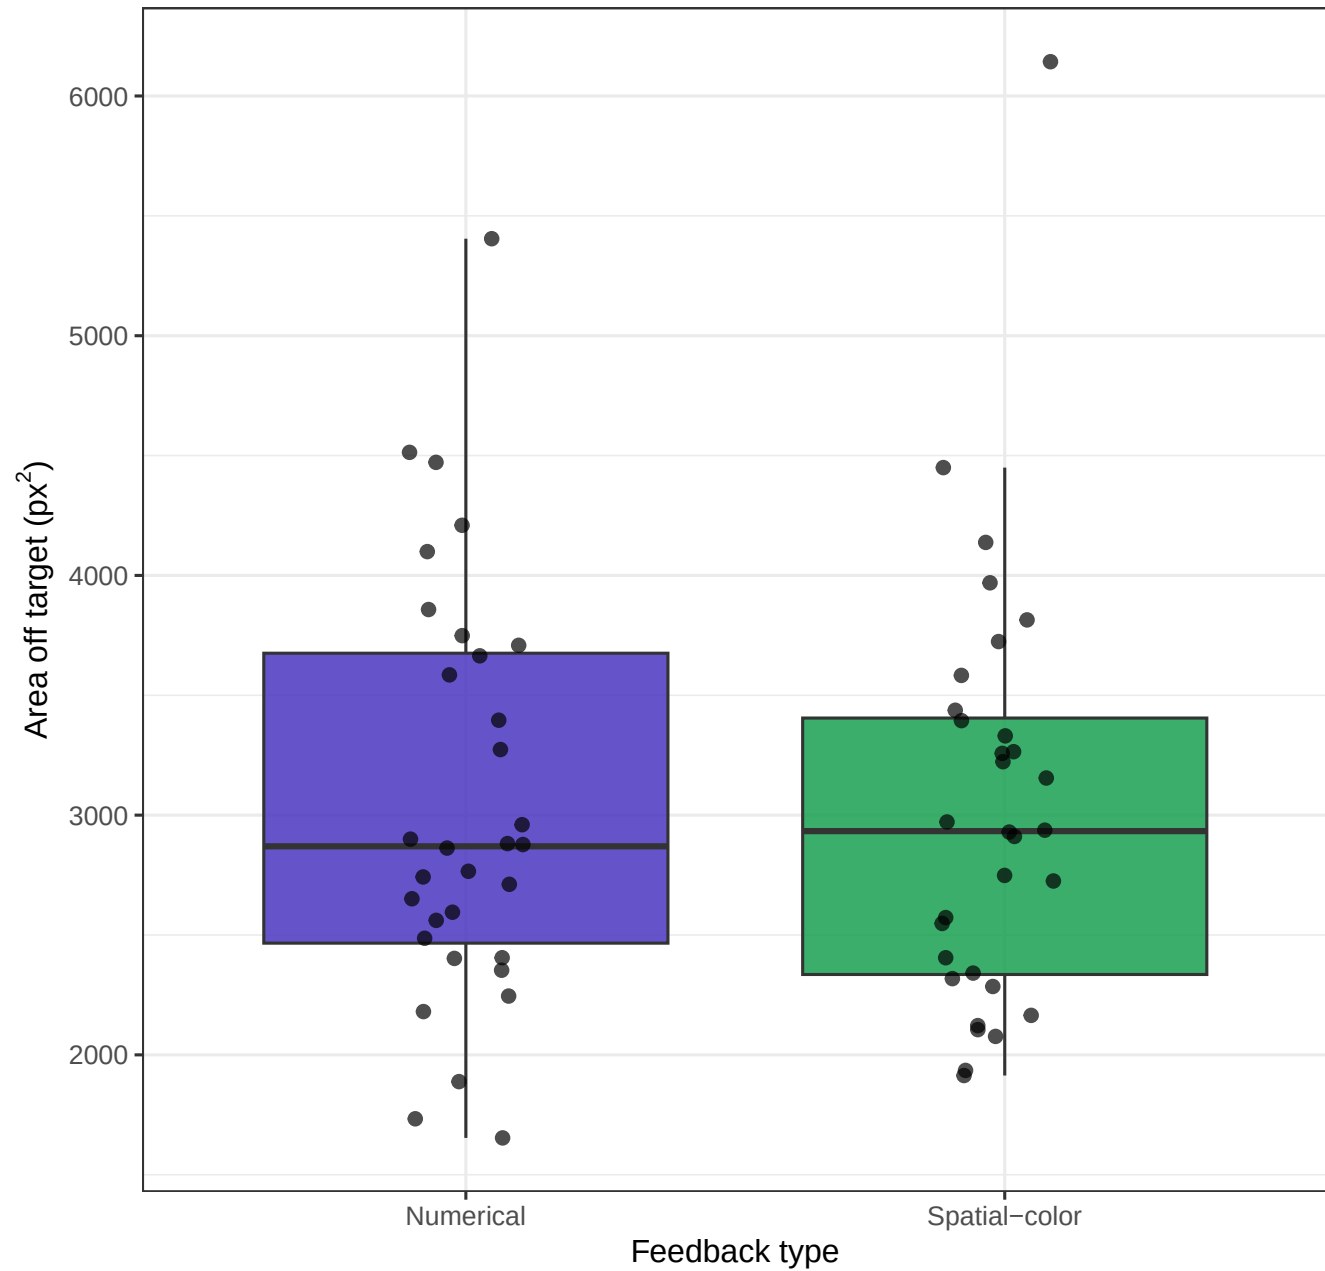

Area off target (outliers removed for sensitivity)

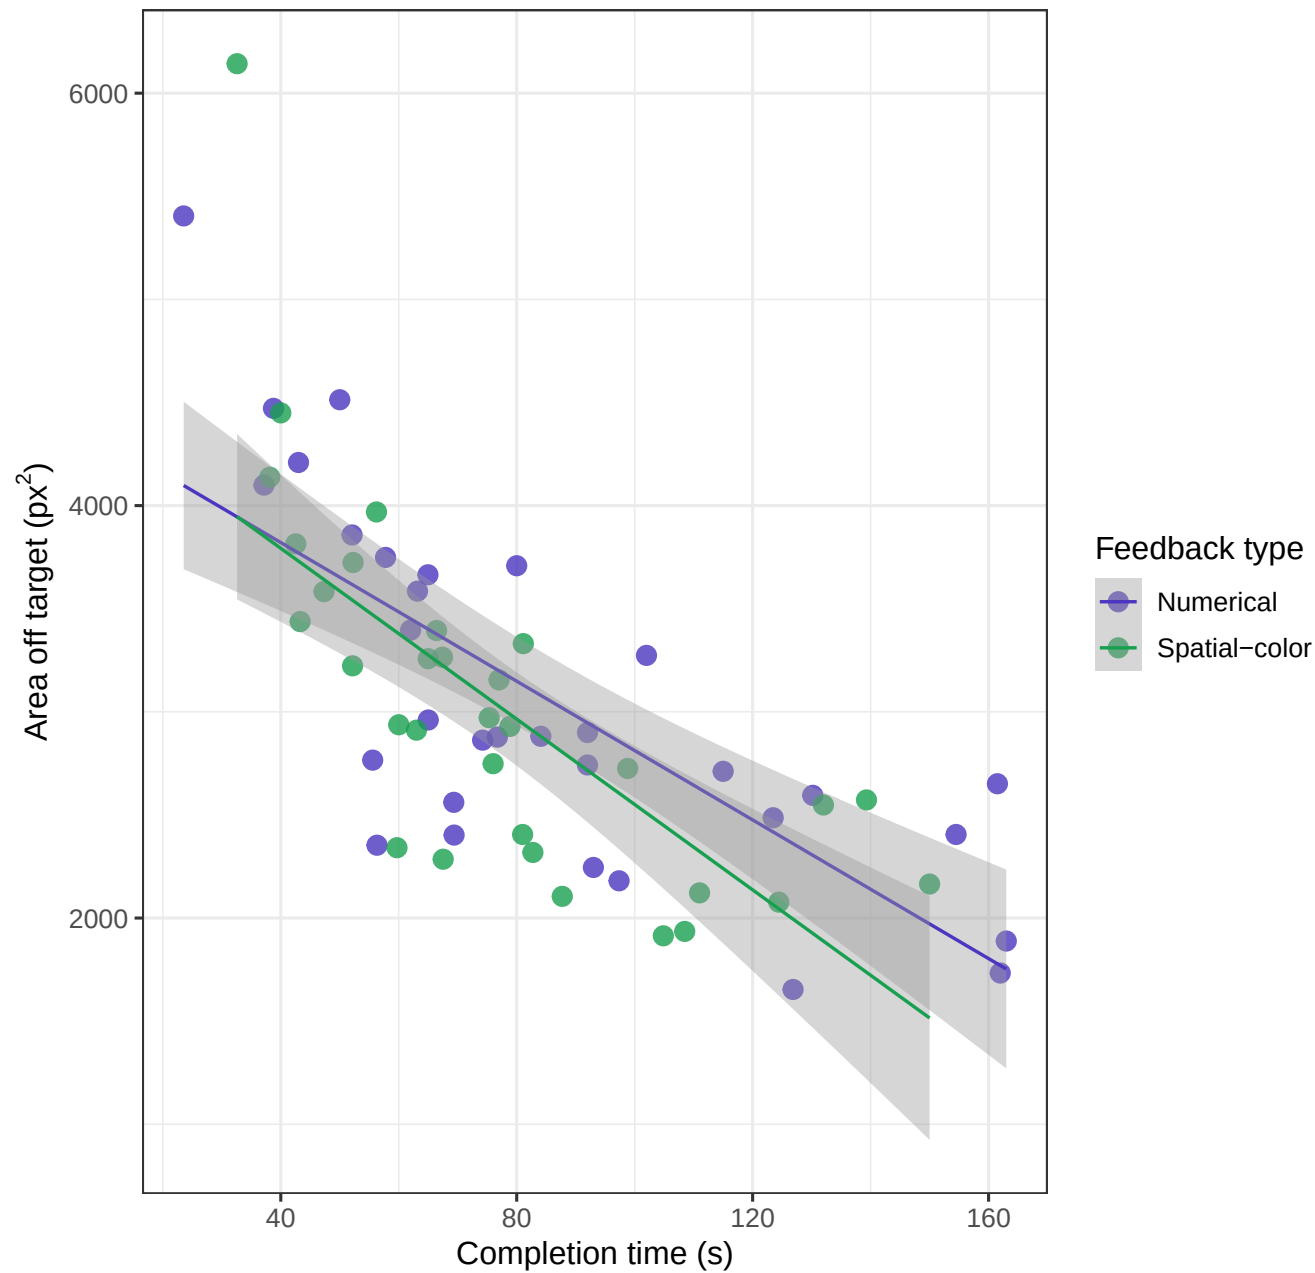

Completion time by feedback type

Accuracy: area off target curve (lower = better)

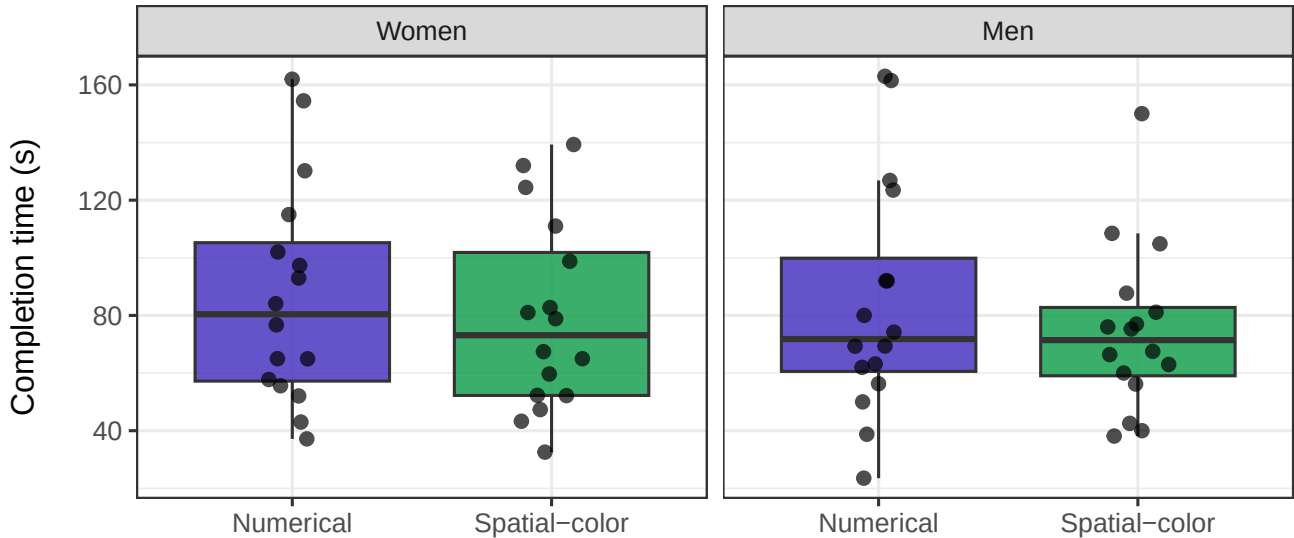

Speed vs trace error (area off target)

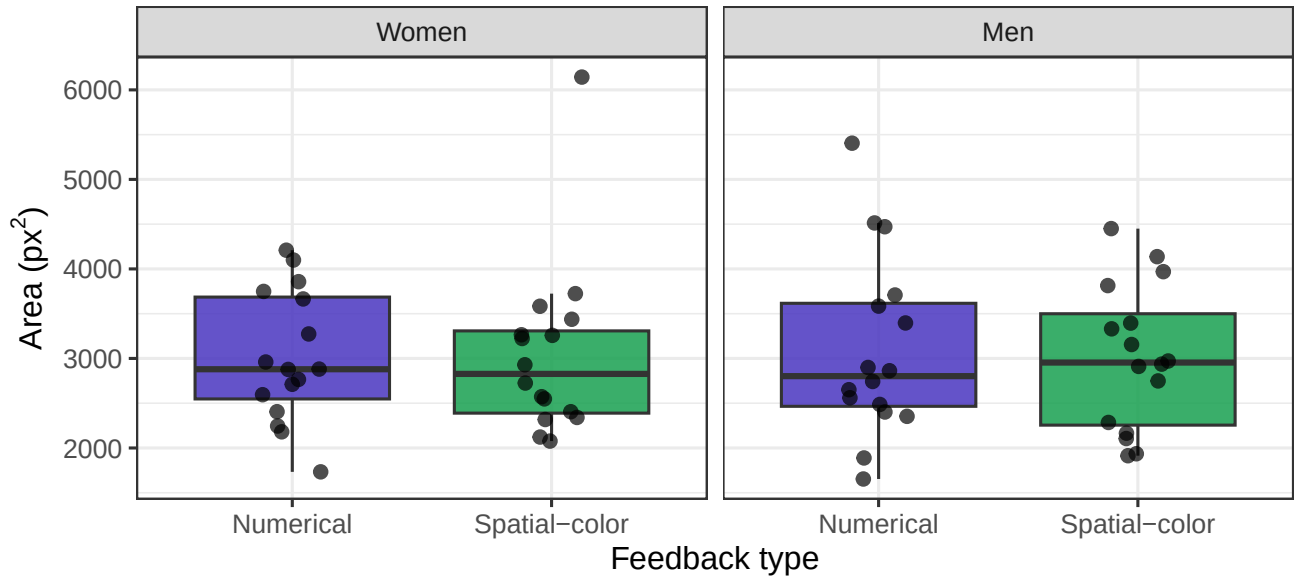

Feedback type: time and accuracy (Women vs Men)

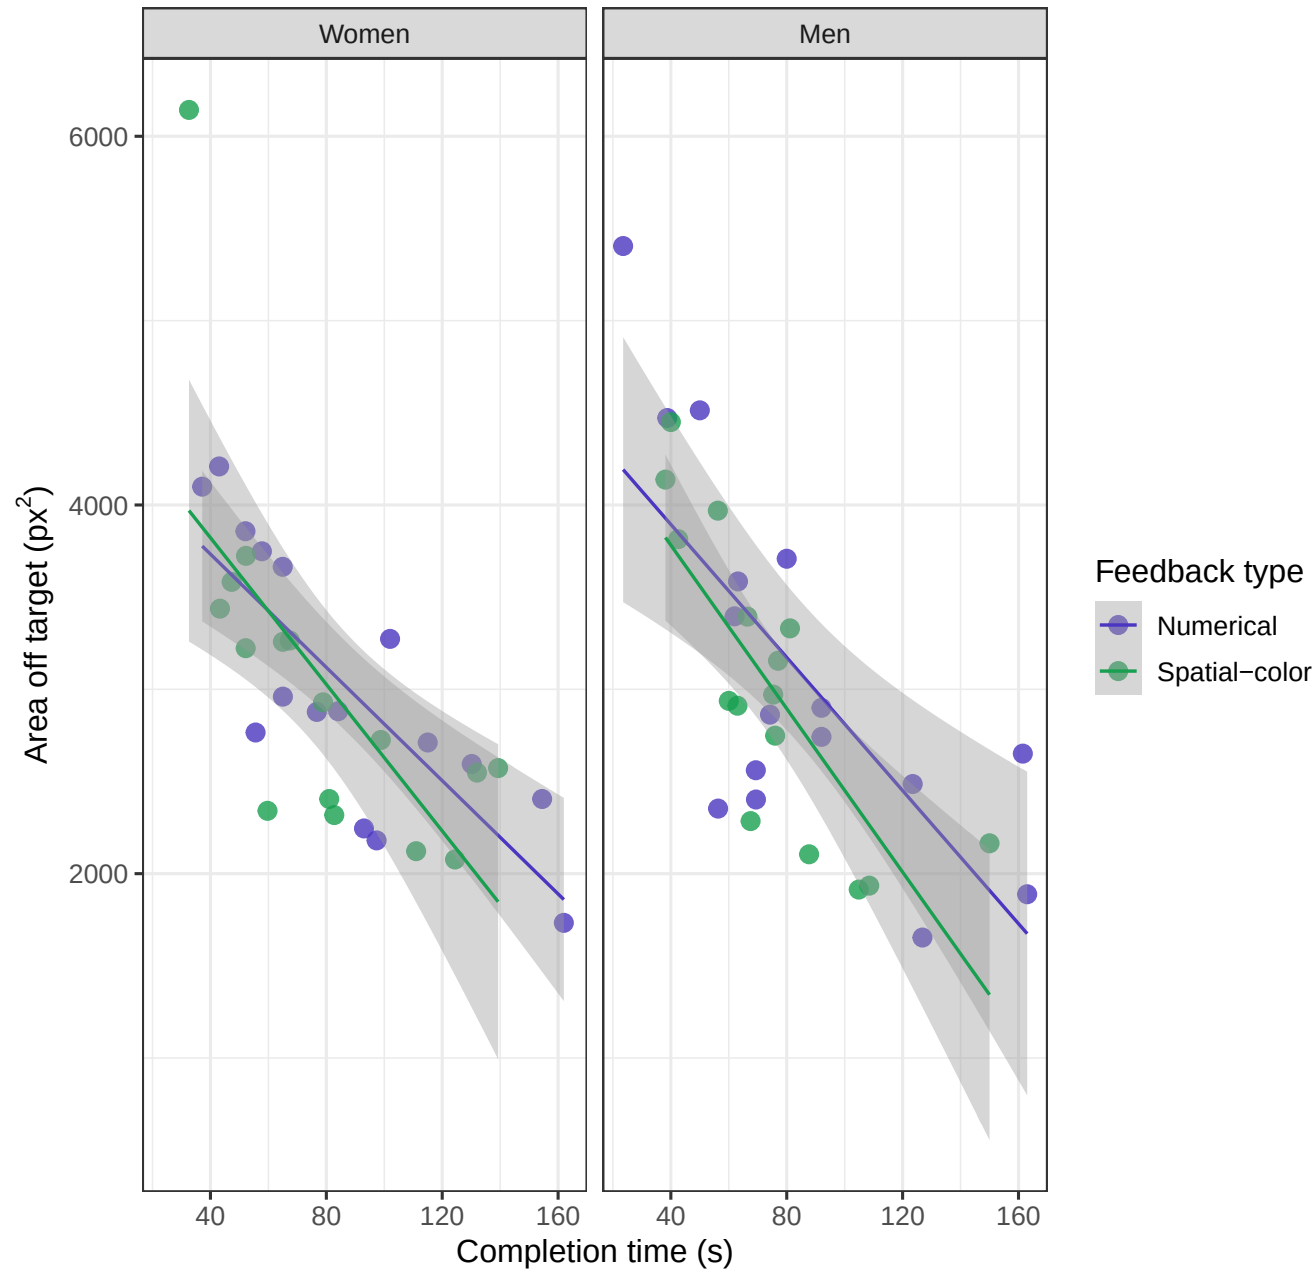

Time (s)

Area off target

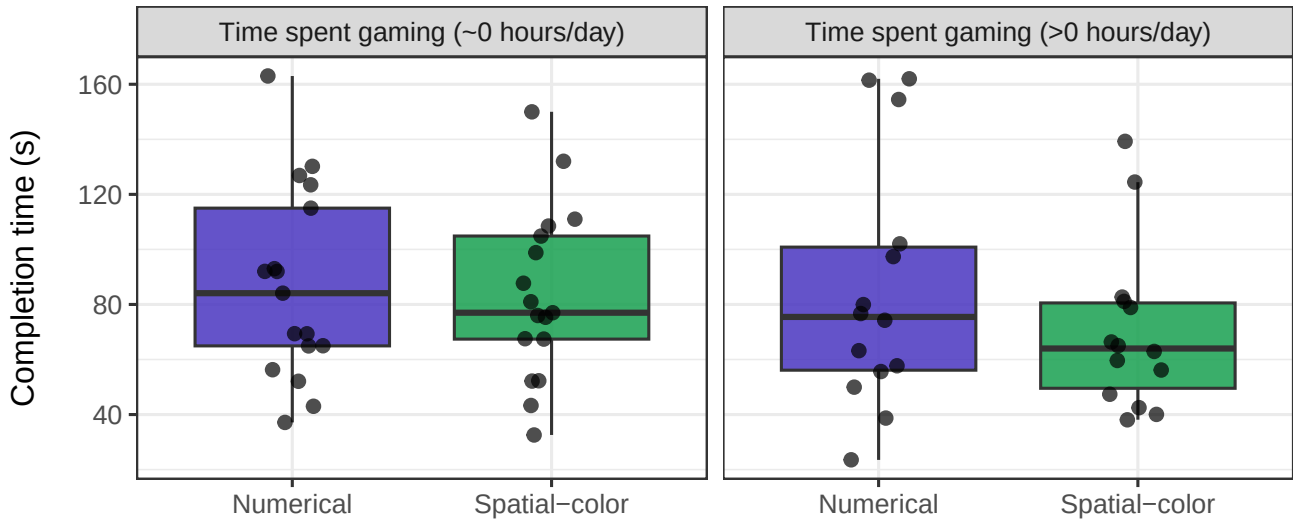

Speed vs trace error (split by gender)

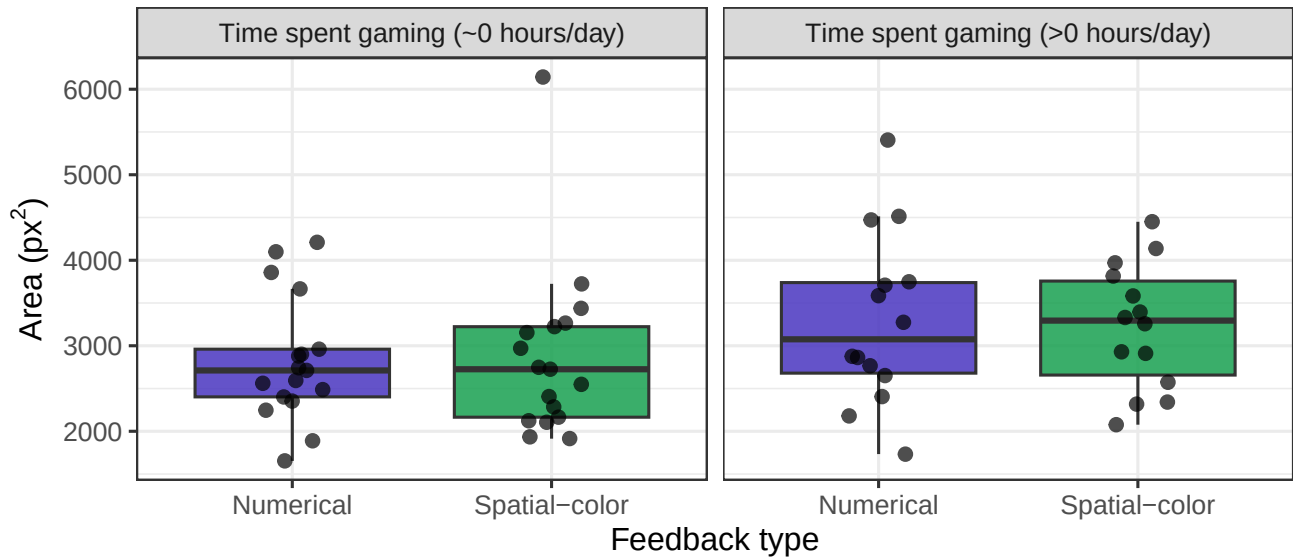

Feedback type: time and accuracy (gaming vs non-gaming groups)

Self-reported typical hours playing games per day

Time (s)

Area off target

Speed vs trace error (split by daily gaming hours)

Self-reported typical hours playing games per day
